Tents for Hire

1. Bell Tent

Our bell tent will suit the person who loves the outdoors and a bit of luxury. The bell tent can sleep from 1-6 people depending on the layout.

Technical Details Bell Tent

Our Bell Tents are composed of cotton canvas that is treated with UV colour fast, mould, rot and water repellent, providing durability and strength for extreme weather conditions.

The ground sheet is a heavy-duty canvas zipped in ground sheet (ZIG) that provides thicker support. In addition to this, we provide you with thicker guy ropes and extra strong durable pegs that will not bend and change shape once they are hammered into the ground.

The zip is protected and concealed by a canvas storm flap that runs its length to ensure zero penetration of water.

There are four zipped windows on this Bell tent and four vents at the top of the bell, all with mosquito mesh fitted. Includes a secondary mosquito mesh entrance.
